

Weltevreden Park Primary School
13 October 2008

To Whom It May Concern:

Spiros of Consulting 2000 assisted me in the setting up of the new Foundation Phase Computer Centre this year. His assistance has been key to the success of the Centre. His advice and commitment to Weltevreden Park Primary has been extremely professional and he is always willing to 'Go the extra mile'. I would highly recommend his services to any business or company in the process of setting up their network or Computer Centre.

He is very helpful with regards to the explanation of, and the use of, new or upgraded programmes and patient with the Educators/Office Staff when dealing with their difficulties understanding/using programmes.

The back up service of Consulting 2000 is very reliable and the computer hardware and software is always of the highest quality. Spiros also takes the initiative when he realises the set up of a system is not conducive to efficient service and will promptly rectify the problem.

I trust the above is in order.

Please feel free to contact me with any further queries regarding this matter.

Yours faithfully
